CONFIDENTIAL MEMO - VIDEO GAME TESTER

Greetings, Participant,

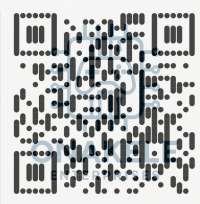

You have been pre-selected for early-stage integration into the DHIA Gaming Interface — a proprietary neural synchronization system designed by Onakele Enterprises for enhanced gaming virtual immersion.

Testers will receive surgical installation of three (3) Onakele Enterprises DHIA microchips:

- One (1) microchip implanted in the middle of the cervical spine
- Two (2) additional microchips installed in the dorsal side of each hand

You are eligible for Phase-1 testing of the DHIA Advanced Gaming System

To ACCEPT this opportunity and begin preparations, scan the encrypted code below after reading the disclaimer on the back of this letter.

Do not scan if faint logo isn't noticeable. Site should show as "qrfy.io/nqzUj2yPtS"

NOTE: Due to the nature of neural integration, this invitation is non-transferable.

Welcome to the future of gaming, control, and virtual reality experiences

DHIA Access Division
ONAKELE ENTERPRISES
"Chip into the future."

IMPORTANT NOTICE – SYSTEM DISCLOSURE & LIABILITY WAIVER

DISCLOSURE REQUIRED UNDER U.S. MARKETING CODE 2049.A

Pursuant to Section 4.7 of the DHIA Participant Agreement, subjects are reminded that all microchip installations are irreversible and may result in altered cognition, feedback hallucinations, or persistent echo memory.

By interacting with the enclosed calibration access protocol, recipient acknowledges and accepts that this communication is part of a simulated neural environment scenario constructed for narrative immersion purposes only.

No physical implantation is required.

This document is a fictional promotional communication created for the purpose of interactive audience engagement. The company, product names, and procedures described herein (including but not limited to: Onakele Enterprises, DHIA Gaming System, and Chippers) are entirely fictional and inspired by the novel "Martha's Notebook: A Zombie Apocalypse Trilogy" by C. Fulster.

Any resemblance to real technologies, companies, or experimental programs is purely coincidental. No user data has been collected. No neural signatures have been stored.

You may safely return to your previously scheduled reality.

For more information about the novel trilogy, the upcoming proof-of-concept short film, or to find out who "Chipper The Zombie" is, visit: cfulster.com or social media platform handles, @cfulsterauthor

Chippers™, AI microchip-controlled zombies, is a Trademarked IP owned by C. Fulster, LLC and all story rights are reserved and copyrighted under the novel, "Martha's Notebook: A Zombie Apocalypse Trilogy."
